

## Business Card COMPOSER

Design and print business and ID cards on Mac

Business Card Composer is a Macintosh software for creating and printing one-of-a-kind business cards, ID cards and badges. Now you will quickly and easily create amazing business cards for yourself in just a few mouse clicks with the help of the Assistant.

### Powerful Editing Tools

A variety of editing tools let you create your own designs with ease. With the help of these tools you can control transparency, fills, tiling, crop images, apply masks and shadows. Smart guides and alignment functionality help to position elements precisely. Use your own custom image as a mask in addition to the 100+ pre-designed masks.

### Diverse Content

Choose among over 24,000 high-quality images, 740 professional designs and 100 additional fonts to create a nice-looking card quickly.

### Mac OS X Integration

Thanks to the seamless integration with Mac OS X **Address Book** all contact information is placed on the card automatically with a single click on the person's record.

Integration with **iPhoto** and **Aperture** lets you preview and use pictures directly from your libraries.

### The Results are Beyond Expectation

## Professional Printing

New printing technology, specially introduced in the app, allows to choose among 3 printing methods to find the one that better fits your needs.

- Print one card design for yourself.
- Print one design for several people.
- And even print multiple designs on the same sheet.

Support for Evolis card printers allows you to print your ID cards in minutes on your Mac.

## Barcodes

You can include any information in the form of a 2D barcode. The program supports Data Matrix, QR, and Code 128 barcodes.

## Google Maps Integration

Google Maps integration helps you to provide exact directions by marking your business location in Google Maps and placing the map image on your card.
