

eMedia CS Standard Edition Design and delivery of badges *Specifications*

Badges bearing your branding!

Do you need identification badges for your employees? Loyalty cards for your customers? Or a sophisticated card that carries encoded data? Whatever be your requirement, it is vital to design badges that publicize your unique branding in a powerful way.

To ensure that your cards match your expectations, Evolis brings you the right solution: eMedia CS.

A comprehensive and easy-to-use solution, eMedia CS matches top-quality graphic designs with various benefits that will soon become crucial in your day-to-day tasks.

A version in line with your requirements

eMedia CS Standard Edition targets the multitude of organizations that insist on flicker-free graphics on their badges. When installed on a Windows 7 PC and connected to an Evolis printer, this software solution is the gateway to designing badges of professional quality in a very easy way.

This version offers an extensive range of features to help you design superior graphics without the assistance of a professional graphic designer. When personalizing a badge, you can add images, logos and even ID pictures from an existing database, or from a device that instantly captures a picture of the holder.

By leveraging MS-Excel, eMedia CS Standard Edition offers a database environment that is familiar to users, and guarantees easy and worry-free management of data.

Note that this version can also link your badges to your information system through data encoding, magnetic stripes, or by using a large variety of barcodes .

Various applications

With eMedia CS Standard Edition, you can design badges for a multitude of purposes : identification access control, loyalty programs, transportation passes and more.
